

Sales Performance & Customer Insights Dashboard

An interactive business intelligence dashboard designed to analyze **sales performance, customer behavior, and product trends** across regions and categories.

This project provides actionable insights through dynamic filtering, KPI tracking, and visual analytics to support data-driven decision-making.

Key Features

-  **Sales by Region** – Geographic visualization of revenue distribution
 -  **Monthly Sales Trend** – Time-series analysis of sales performance
 -  **Top 10 Products** – Best-performing products by sales
 -  **Sales by Category** – Revenue comparison across Technology, Furniture, and Office Supplies
 -  **KPI Cards** –
 - Total Sales
 - Total Profit
 - Total Orders
 -  **Interactive Filters** –
 - Region slicer (Central, East, South, West)
 - Category slicer
 - Order date range selector
-

Insights Delivered

- Technology category generates the highest revenue
- Clear seasonal sales patterns across months
- Product-level contribution to overall performance
- Regional sales distribution visualization

Project Objective

To transform raw sales data into a structured and interactive dashboard that enables stakeholders to:

- Monitor performance metrics
- Identify high-performing products
- Analyze profitability trends
- Make strategic business decisions

Conclusion

This project demonstrates:

- Strong **SQL querying skills**
- Data cleaning & transformation
- Business insight generation
- Interactive dashboard creation using **Power BI**
